### **Failsafe**

### Novibra® type RA™ Metalastik® type Failsafe EF™

For effective isolation of vibration and noise on machines with rotating movements, the product can be applied to:

- Pumps
- Fans
- Converters
- Compressors
- Combustion engines
- Industrial and Marine gensets
- Generators

Also suitable for use with presses, punches and other work shop machines.

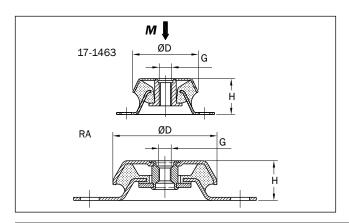

#### **Features**

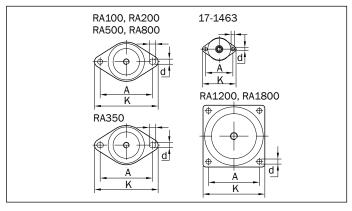

RATM and EFTM uses the rubber profile in shear and compression, obtaining good vertical flexibility with the advantage of horizontal stability.

For normal speeds of approx. 1500 rpm, the  $RA^{\text{\tiny TM}}$  and  $EF^{\text{\tiny TM}}$ type provides a degree of isolation of 75-85%. For better isolation, the alternative RAEM™ or M™ can be chosen.

Its unique construction and the latest production methods make Novibra® type RA™ and EF™ a high performance mounting having a number of advantages:

- ▼ Rubber features are utilised effectively combining compression and shear.
- Wide load rating options, 40-2100 kg.
- ▼ Corrosion protected to cope with arduous environments on land or marine applications (Fe/Zn8C as per ISO 2081).
- ▼ Fitted as standard with an integral fail-safe design device with resilient stop, making RA and EF ideal for use in mobile applications. The RATM/EFTM mounts can accomodate occasional shock loads. The mount will withstand shock loads up to 2 g without plastic deformation.
- ▼ Clear and durable product marking so that mountings can be identified even after several years in operation.
- ▼ Domed shape cover to protect against oil contamination.
